Editorial Review

Review
"Extremely informative, challenging, and often times humorous -- this book is highly recommended." - Doug Thompson

From the Author
We hope you enjoy reading and learning from this book as much as we enjoyed writing it. Coding with JavaScript For Dummies is the result of hundreds of hours of writing chapters, drinking coffee, reading chapters, discussing chapters, rewriting chapters, and thinking like JavaScript beginners.

We used an extreme form of collaboration throughout the process of writing this book. Each word and sentence was actually signed off on (several times) and typed by both of us. As a result, no single page of the book can be said to have been written by Chris or by Eva. This is different from every other book with co-authors that we're aware of -- usually, chapters are divided between authors and the reader may notice a change in voice at some point in the book. Not here.

Even the screenshots were shot by both of us. You may notice that all of the odd numbered screenshots were done on a Mac (by Chris) and the even numbered ones were done using Windows (by Eva).

We believe that our collaboration made us both better writers and resulted in a better book than if either of had written it by ourselves.

If you have any questions about the book prior to purchasing it, or after purchasing it, please don't hesitate to reach out to us through our company, WatzThis?.

Thank you, and enjoy!
-Chris and Eva
