

Handbook of Research on Solar Energy **Systems and Technologies**

By Sohail Anwar

Handbook of Research on Solar Energy Systems and Technologies By Sohail Anwar

The last ten years have seen rapid advances in nanoscience and nanotechnology, allowing unprecedented manipulation of nanoscale structures controlling solar capture, conversion, and storage.

Filled with cutting-edge solar energy research and reference materials, the Handbook of Research on Solar Energy Systems and Technologies serves as a one-stop resource for the latest information regarding different topical areas within solar energy. This handbook will emphasize the application of nanotechnology innovations to solar energy technologies, explore current and future developments in third generation solar cells, and provide a detailed economic analysis of solar energy applications.
