People are Seeing Something: A Survey of Lake Monsters in the United States and Canada By Denver Michaels

In this book, Denver Michaels examines reports of lake monsters in the United States and Canada. Simply put, Michaels' title says it all—people are seeing something—sincere, honest people report seeing strange creatures in the water on a regular basis. The reports are real; moreover, there is much more to the plethora of sightings than just the misidentification of known animals and hoaxes. Michaels also takes the time to examine the bodies of water where cryptids are said to dwell. Could the nature of the lakes themselves point to some sort of link that could help explain lake monster sightings? Although Michaels believes that uncategorized creatures exist, he approaches the topic with a skeptical eye.

Editorial Review

Review

(shan) Littlebookcove: (Goodreads)

I'm sure you've all heard of Nezzie a famous sea monster in Scotland is she real? Does she exist is she even a she? Who know's! But I do believe strongly in the possibilities.

Denver Michaels Composes some of America's most famous cyrptid cases in this book. His work is well written and Presented. With history and stories. And links to some of the cases too.

A really good read for any Cryptozoology Fan. And I look really forward to reading more of his work in the future. --goodreads.com/book/show/28631277-people-are-seeing-something

Richard: (Goodreads)

Excellent. Coming from the UK, I was only aware of our own Loch Ness Monster, which has effectively been dismissed as fantasy for anyone below the age of 10 and people involved in flogging Nessie gifts and / or the Scottish tourist board. However, reading all these examples from North America, it does make you wonder. They can't all be sturgeon, or bow waves, or people making it up, can they?

Hopefully there will be a follow up book for South America, or the rest of the world. Definitely worth a read.--goodreads.com/book/show/28631277-people-are-seeing-something

From the Back Cover

Throughout the United States and Canada, there are innumerable reports of strange creatures lurking in the waters. Tales of sea, lake, and river monsters predate the arrival of Europeans to the continent by centuries.

Though the lake monster phenomenon has largely been written off as the work of hoaxers or the misidentification of known species, author Denver Michaels does not believe that these creatures can be dismissed quite so easily. Michaels believes that people are seeing something in the water, and he explores the mystery in depth in his work.

About the Author

Denver Michaels is an author and researcher with a passion for cryptozoology, the paranormal, lost civilizations, and all things unexplained. Michaels' love for the unexplained began at an early age, and has only intensified over the years. In his late teens, Michaels' became interested in lake monsters, and by his late twenties it was turning into an obsession. Now in his early forties, Michaels' has taken his years of research and started writing about mysterious creatures and the unexplained. www.denvermichaels.net
