

International Tables for Crystallography, Reciprocal Space (IUCr Series. International Tables of Crystallography)

From Wiley

International Tables for Crystallography, Reciprocal Space (IUCr Series. International Tables of Crystallography) From Wiley

International Tables for Crystallography is the definitive resource and reference work for crystallography and structural science.

Volume B presents accounts of the numerous aspects of reciprocal space in crystallographic research. This volume is a vital addition to the library of scientists engaged in crystal structure determination, crystallographic computing, crystal physics and other fields of crystallographic research. Graduate students specializing in crystallography will find much material suitable for self-study and a rich source of references to the relevant literature.

New to this edition:

A new chapter on modern extensions of the Ewald method for Coulomb interactions in crystals.

Three new sections on electron diffraction and electron microscopy in structure determination, describing point-group and space-group determination by convergent-beam electron diffraction, three-dimensional reconstruction, and single-particle reconstruction.

Substantial revisions to the chapters on space-group representations in reciprocal space, direct methods, Patterson and molecular replacement techniques, and disorder diffuse scattering

More information on the series can be found at: <http://it.iucr.org>

Editorial Review

Users Review

From reader reviews:

Louis Jackson:

This book untitled International Tables for Crystallography, Reciprocal Space (IUCr Series. International Tables of Crystallography) to be one of several books this best seller in this year, here is because when you read this publication you can get a lot of benefit on it. You will easily to buy this kind of book in the book retail outlet or you can order it via online. The publisher with this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Smartphone. So there is no reason for your requirements to past this reserve from your list.

Gary Morrell:

Typically the book International Tables for Crystallography, Reciprocal Space (IUCr Series. International Tables of Crystallography) will bring you to the new experience of reading some sort of book. The author style to spell out the idea is very unique. When you try to find new book to see, this book very suitable to you. The book International Tables for Crystallography, Reciprocal Space (IUCr Series. International Tables of Crystallography) is much recommended to you you just read. You can also get the e-book from official web site, so you can more easily to read the book.

Gregory Sims:

Do you have something that you want such as book? The reserve lovers usually prefer to opt for book like comic, small story and the biggest one is novel. Now, why not hoping International Tables for Crystallography, Reciprocal Space (IUCr Series. International Tables of Crystallography) that give your pleasure preference will be satisfied through reading this book. Reading routine all over the world can be said as the method for people to know world considerably better then how they react in the direction of the world. It can't be explained constantly that reading practice only for the geeky individual but for all of you who wants to possibly be success person. So , for all you who want to start studying as your good habit, you may pick International Tables for Crystallography, Reciprocal Space (IUCr Series. International Tables of Crystallography) become your own starter.

Lorene Lord:

As we know that book is essential thing to add our knowledge for everything. By a book we can know everything you want. A book is a group of written, printed, illustrated or maybe blank sheet. Every year ended up being exactly added. This reserve International Tables for Crystallography, Reciprocal Space (IUCr

Series. International Tables of Crystallography) was filled in relation to science. Spend your extra time to add your knowledge about your research competence. Some people has different feel when they reading some sort of book. If you know how big good thing about a book, you can sense enjoy to read a e-book. In the modern era like today, many ways to get book which you wanted.
