How Come?: Every Kid's Science Questions Explained By Kathy Wollard

Fact-filled, fun-filled, as interesting to parents as it is to kids, the *How Come?* series is the trusted source for lively, clear answers to kids' science queries. Now the best questions and answers from all three books—*How Come?*; *How Come? Planet Earth*; and *How Come? In the Neighborhood?*—have been revised, updated, freshly illustrated in full color, supplemented with twenty completely new questions, and combined into one bigger, better volume.

How Come? explains, in fascinating detail, more than 200 mysteries and phenomena in the world around us. These are the questions that pique kids' curiosity—and stump parents.

When it rains, does running (rather than walking) to the nearest shelter really keep you any drier?

How can a stone skip across a pond (instead of sink)?

If the Earth is spinning, why can't we feel it? Why don't we fly off?

Why do elephants have trunks?

And the all-time classic, *Why is the sky blue?* (Sunlight has a hidden rainbow of colors, and air molecules scatter blues the most—sending bright blue light down to Earth.)

The text is clearly written, engaging, and accessible. It's for every kid who wants to know—and every grown-up who simply doesn't know.
