Writing Education Research: Guidelines for Publishable Scholarship By Joy Egbert, Sherry Sanden

For both new academics and those with some experience, writing articles of publishable quality can be particularly challenging. Developing the necessary skill set requires useful information, hard work, and the type of direction infrequently offered in research methods courses, leaving researchers to piece together resources on their own. This book addresses this critical topic in a format that is easy to teach and understand. It is a practical volume that teaches researchers how to identify their audience, clearly state the nature of their work, provide exceptional literature reviews, cite appropriately, and explicate their research.

Beginning each chapter with reviewer comments, *Writing Education Research* is designed to help scholars understand both how to write effective research reports and how to get published. Practice exercises and resource lists in each chapter offer easy-to-access information about the review and publication process. A perfect accompaniment to standard research courses, this practical book demystifies the writing process for anyone looking to publish articles, chapters, or papers in education.

Editorial Review

Review

Egbert and Sanden's text is a valuable resource for both novices and seasoned authors and reviewers. It provides important reminders about what to do and what to avoid when crafting research for publication. Their unique format, specifically invoking reviewers' comments to identify areas of need, using examples to show where authors stray and hit the mark, makes potentially dull points come to life. I enjoyed and learned from this text – a combined benefit that I think a wide array of readers will share.

Mary F. Roe, Professor and Head of Teacher Education and Leadership, Utah State University, USA

This book is a great resource for both young and experienced education researchers. I recommend this book for anyone who is willing to learn about academic writing and review. It's useful and timely to have a book like this to help demystify the fairly complex publication process.

Olusola O. Adesope, Assistant Professor of Educational Psychology, Washington State University, USA

About the Author

Joy Egbert is Professor of Education at Washington State University, Pullman.

Sherry Sanden is Assistant Professor of Early Childhood Literacy at Illinois State University.

Users Review

From reader reviews:

Ramon Hudson:

Information is provisions for anyone to get better life, information nowadays can get by anyone at everywhere. The information can be a know-how or any news even an issue. What people must be consider if those information which is inside the former life are challenging to be find than now is taking seriously which one is suitable to believe or which one the resource are convinced. If you find the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All of those possibilities will not happen inside you if you take Writing Education Research: Guidelines for Publishable Scholarship as the daily resource information.

Anne Hahn:

Reading a reserve tends to be new life style with this era globalization. With reading through you can get a

lot of information which will give you benefit in your life. Along with book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire all their reader with their story or perhaps their experience. Not only the storyline that share in the books. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors nowadays always try to improve their ability in writing, they also doing some research before they write to their book. One of them is this Writing Education Research: Guidelines for Publishable Scholarship.

Brooke Gafford:
