Handbook of Metrics for Research in Operations Management: Multi-item Measurement Scales and Objective Items By Aleda V. (Vender) Roth, Roger G. Schroeder, Xiaowen Huang, M. (Mehmet) Murat Kristal

The **Handbook of Metrics for Research in Operations Management** is a compilation of multi-item scales and objective items that can be used to construct surveys and questionnaires in Operations Management. Such surveys can be sent to manufacturing or service managers to collect empirical data on their operations for research purposes. The metrics can be used to measure constructs such as Total Quality Management, Just-In-Time manufacturing, Operations Strategy, Technology Management, Supply Chain Management, performance of operations and related concepts.

Key Features

- *Employs a systematic summary of 1803 multi-item, measurement scales, and objective metrics:* Derived from 230 published articles, comprehensive summaries for each scale are available in one source.
- *Cross-classifies measurement scales in two ways:* Each scale is classified by categories that are based on OM research topics accepted by major OM journals and by first author names.
- *Provides a discussion of objective measures used in OM research:* Illustrative items and examples from 5 questionnaires are given.
- *Increases the efficiency and potential rigor of the researcher's efforts:* Discussion and selected bibliography on key issues for careful construction of new items encourage further development and refinement of psychometrically sound OM metrics.

Intended Audience

This **Handbook** is an essential, time-saving resource for virtually all operations, supply chain, and technology scholars and practitioners interested in empirical research. A vital addition to all academic libraries, it is intended to serve as a

basic reference and guide for construction of surveys and other structured data collection on OM topics.

Periodic updates and further compilations from other journals are available at <http://webpages.csom.umn.edu/oms/schroeder/scalebook/index.html>.

Editorial Review

About the Author

Aleda V. Roth is the Burlington Industries Distinguished Professor of Supply Chain Management at Clemson University. She is an internationally recognized empirical scholar in service and manufacturing operations strategy. Her research is motivated by theoretical and practical explanations of how firms can best deploy their global supply chains, operations, and technology strategies for competitive advantage. Dr. Roth has more than 150 publications to her credit; and her work has been distinguished by 43 research awards and 27 grants. She holds senior editorial positions for *Management Science*, *Production and Operations Management (POM)*, *Journal of Operations Management (JOM)*, *Decision Sciences (DSJ)*, *Journal of Supply Chain Management* and others. She served as President of the Production and Operations Management Society (POMS); was named the 2006 OM Scholar at the Academy of Management; and is a Fellow of the Decision Sciences Institute, POMS, and UK Advanced Institute of Management Research (AIM). Dr. Roth is a member of the Conference Board's Performance Excellence Council has consulted with corporate staff at leading global companies. She worked in top management for a decade before earning her PhD in at Ohio State University, where she also received her BS. She received her MSPH in biostatistics from UNC-Chapel Hill.

Roger G. Schroeder holds the Frank A. Donaldson Chair in Operations Management at the Carlson School of Management, University of Minnesota. He received his Ph.D. from Northwestern University and has published over 100 papers in academic journals on the topics of quality management, operations strategy and high performance manufacturing. Professor Schroeder is a leader in empirical research in Operations Management. He is a Fellow of the Decision Sciences Institute and received the Lifetime Scholarship Achievement Award from the Academy of Management, Operations Management Division. In 2005, he received the Dean's prize for best researcher in the Carlson School of Management and was inducted into the University of Minnesota Academy of Distinguished Teachers. According to ISI, he is the most highly cited scholar in the world in the Operations Management field. Professor Schroeder is the author of the highly regarded textbook entitled: *Operations Management: Contemporary Concepts and Cases*, published by McGraw-Hill.

Xiaowen Huang is an assistant professor of supply chain and operations management at the Richard T. Farmer School of Business, Miami University, Ohio. She teaches in the areas of operations management, supply chain management, and operations strategy. Her research interest primarily revolves around the question of "how can companies achieve competitive advantage through effective technology management, especially in the supply chain context?" Her current research falls into two main research streams. The first stream includes empirical investigation of use of information and Internet technologies (especially online auction) in the manufacturing setting and in the retail e-Bay setting. Her second research stream involves theoretical understanding and testing effective product modularity and mass customization strategies. Her research appears in *Journal of Operations Management* and other academic journals. She received her PhD from the Operations and Management Science Department, University of Minnesota.

M. Murat Kristal is an assistant professor of operations management at Schulich School of Business at York University, Toronto, Canada. He teaches in the areas of operations management/strategy, supply chain management, and statistical models. Dr. Kristal received his Ph.D. from the Operations Management Department in the Kenan-Flagler Business School at University of North Carolina at Chapel Hill. His research interests focus on the areas of supply chain, operations management and strategy. His current empirical research spans from how supply chains adapt to their competitive environments to how manufacturers achieve mass customization capabilities.

Users Review

From reader reviews:

Hazel Polk:

As people who live in often the modest era should be change about what going on or facts even knowledge to make these keep up with the era which is always change and move ahead. Some of you maybe will certainly update themselves by looking at books. It is a good choice for yourself but the problems coming to an individual is you don't know what kind you should start with. This Handbook of Metrics for Research in Operations Management: Multi-item Measurement Scales and Objective Items is our recommendation so you keep up with the world. Why, because book serves what you want and want in this era.

Abel Mulholland:

Spent a free the perfect time to be fun activity to perform! A lot of people spent their leisure time with their family, or their particular friends. Usually they undertaking activity like watching television, likely to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Might be reading a book can be option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the guide untitled Handbook of Metrics for Research in Operations Management: Multi-item Measurement Scales and Objective Items can be good book to read. May be it may be best activity to you.

Willard Griffin:

The reason? Because this Handbook of Metrics for Research in Operations Management: Multi-item Measurement Scales and Objective Items is an unordinary book that the inside of the reserve waiting for you to snap the idea but latter it will surprise you with the secret this inside. Reading this book close to it was fantastic author who all write the book in such amazing way makes the content interior easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of benefits than the other book get such as help improving your talent and your critical thinking technique. So , still want to postpone having that book? If I had been you I will go to the reserve store hurriedly.

Shirley Morales:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from your book. Book is published or printed or created from each source in which filled update of news. On this modern era like right now, many ways to get information are available for you. From media social like newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just looking for the Handbook of Metrics for Research in Operations Management: Multi-item Measurement Scales and Objective Items when you required it?
