Mathematical Mindsets: Unleashing Students' Potential through Creative Math, Inspiring Messages and Innovative Teaching By Jo Boaler

Banish math anxiety and give students of all ages a clear roadmap to success

Mathematical Mindsets provides practical strategies and activities to help teachers and parents show all children, even those who are convinced that they are bad at math, that they can enjoy and succeed in math. Jo Boaler—Stanford researcher, professor of math education, and expert on math learning—has studied why students don't like math and often fail in math classes. She's followed thousands of students through middle and high schools to study how they learn and to find the most effective ways to unleash the math potential in all students.

There is a clear gap between what research has shown to work in teaching math and what happens in schools and at home. This book bridges that gap by turning research findings into practical activities and advice. Boaler translates Carol Dweck's concept of 'mindset' into math teaching and parenting strategies, showing how students can go from self-doubt to strong self-confidence, which is so important to math learning. Boaler reveals the steps that must be taken by schools and parents to improve math education for all. *Mathematical Mindsets*:

- Explains how the brain processes mathematics learning
- Reveals how to turn mistakes and struggles into valuable learning experiences
- Provides examples of rich mathematical activities to replace rote learning
- Explains ways to give students a positive math mindset
- Gives examples of how assessment and grading policies need to change to support real understanding

Scores of students hate and fear math, so they end up leaving school without an understanding of basic mathematical concepts. Their evasion and departure hinders math-related pathways and STEM career opportunities. Research has shown very clear methods to change this phenomena, but the information has been confined to research journals—until now. *Mathematical Mindsets* provides a proven, practical roadmap to mathematics success for any student at any age.

PRAISE FOR MATHEMATICAL MINDSETS

"Mistakes, struggles, creativity, beauty, flexibility, equity—Jo Boaler uses these words to describe a vision of mathematics where every student thrives and becomes a mathematical thinker. By following Boaler's roadmap, perhaps we can once and for all lay to rest decades of archaic and destructive notions about what it takes to be good at math."

—**Cathy Seeley**, Past President, National Council of Teachers of Mathematics and author of *Faster Isn't Smarter* and *Smarter Than We Think*

"Jo Boaler is justifiably tired of all the uninformed BS about math education. Too many children's lives are being harmed. In this book, she takes the gloves off and comes out fighting. Her weapon? Scientific data. Lots of it. A readable, engaging, compelling case for revolutionizing math education. Ignore her message and you (or your children, or your students) will be locked out of much of the 21st Century."

—**Dr. Keith Devlin**, Stanford University mathematician, NPR "Math Guy," and author of *Mathematics Education for a New Era*

"Jo Boaler calls out the mindsets that can cripple a student's aptitude for math and ways to change them. More than just a replacement set of positive messages, Jo's book elaborates practical, research-tested strategies for teaching, assessment, practice, and homework—all to help a student learn and love to learn mathematics."

—**Dan Meyer**, former math teacher, Chief Academic Officer at Desmos, author, and consultant

Scores of students hate and fear math, so they end up leaving school without an understanding of basic mathematical concepts. How can we help all children know that they have vast mathematics potential? How can teachers instruct in a way that brings this belief to life?

Drawing on her extensive research with thousands of students, author Jo Boaler reveals how teachers, parents, and other caregivers can transform children's ideas and experiences of math through a positive growth mindset method. Filled with illustrative examples, *Mathematical Mindsets* is an important guide to the information, techniques, and activities that can be put in place to make math more enjoyable and achievable for all students. *Mathematical Mindsets* shows how the entire approach to math teaching and learning—from paying attention to the math questions and reviewing the tasks students work on to the methods teachers and parents use to encourage or grade students—needs to be changed to help students realize the joys of learning and understanding math.

About the Author

DR. JO BOALER is a professor of mathematics education at Stanford University. The author of seven books and numerous research articles, she serves as an advisor to several Silicon Valley companies and is a White House presenter on girls and STEM (Science, Technology, Engineering, and Math). She is a regular

contributor to news and radio in the United States and England and recently formed youcubed.org to give teachers and parents the resources and ideas they need to inspire and excite students about mathematics.

From reader reviews:

Velda Thornley:

The knowledge that you get from *Mathematical Mindsets: Unleashing Students' Potential through Creative Math, Inspiring Messages and Innovative Teaching* could be the more deep you searching the information that hide in the words the more you get interested in reading it. It does not mean that this book is hard to know but *Mathematical Mindsets: Unleashing Students' Potential through Creative Math, Inspiring Messages and Innovative Teaching* giving you joy feeling of reading. The copy writer conveys their point in specific way that can be understood by simply anyone who read the item because the author of this reserve is well-known enough. This kind of book also makes your personal vocabulary increase well. Therefore it is easy to understand then can go with you, both in printed or e-book style are available. We suggest you for having that *Mathematical Mindsets: Unleashing Students' Potential through Creative Math, Inspiring Messages and Innovative Teaching* instantly.

Angela Rodriguez:

Reading a e-book tends to be new life style in this particular era globalization. With reading through you can get a lot of information that could give you benefit in your life. Along with book everyone in this world can certainly share their idea. Books can also inspire a lot of people. The authors nowadays always try to improve their ability in writing, they also doing some analysis before they write to their book. One of them is this *Mathematical Mindsets: Unleashing Students' Potential through Creative Math, Inspiring Messages and Innovative Teaching*.

William Walker:

In this time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher this print many kinds of book. The actual book that recommended to you is *Mathematical Mindsets: Unleashing Students' Potential through Creative Math, Inspiring Messages and Innovative Teaching* this publication consist a lot of the information on the condition of this world now. This kind of book was represented how can the world has grown up. The terminology styles that writer use for explain it is easy to understand. Often the writer made some investigation when he makes this book. This is why this book suited all of you.

Do you like reading a reserve? Confuse to looking for your selected book? Or your book was rare? Why so many problem for the book? But any people feel that they enjoy for reading. Some people likes reading, not only science book but additionally novel and Mathematical Mindsets: Unleashing Students' Potential through Creative Math, Inspiring Messages and Innovative Teaching or even others sources were given information for you. After you know how the great a book, you feel desire to read more and more. Science e-book was created for teacher as well as students especially. Those textbooks are helping them to increase their knowledge. In additional case, beside science guide, any other book likes Mathematical Mindsets: Unleashing Students' Potential through Creative Math, Inspiring Messages and Innovative Teaching to make your spare time a lot more colorful. Many types of book like here.
