Human Dimension & Interior Space: A Source Book of Design Reference Standards By Julius Panero, Martin Zelnik

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space.

Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts.

The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions.

In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean

Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With *Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments.

Editorial Review

About the Author

Julius Panero, AIA, ASID, is a practicing architect, interior designer, and an associate professor of interior design at the Fashion Institute of Technology (FIT) in New York. He has taught interior design for the last twenty years and was the former chairperson of the Interior Design department at FIT. A graduate of Pratt Institute, where he received a bachelor of architecture's degree, and Columbia University, where he received a master of science degree in urban planning, Panero is a member of the American Institute of Architects, the American Society of Interior Designers, and a fellow of the Royal Society of the Arts, London. Licensed to practice architecture in New York, Panero is a principal in the consulting firm of Panero Zelnik Associates, Architects/Interior Designers. He is also the author of *Anatomy for Interior Designers* and a contributing author to *Time-Saver Standards*. **Martin Zelnik**, AIA, ASID, NCARB, is a practicing architect, interior designer, and an assistant professor of interior design at the Fashion Institute of Technology in New York, where he has taught interior design for the last ten years. A graduate of Brandeis University, where he received a bachelor of fine arts degree, and Columbia University, where he earned a master of architecture degree, Zelnik is a member of the American Institute of Architects, the New York Society of Architects, the Interior Design Educators Council, and the American Society of Interior Designers. A special consultant to the National Council of Interior Design Qualification, Zelnick is a principal in the New York consulting firm of Panero Zelnik Associates, Architects/Interior Designers.

In examining the relationship between human dimension and dining spaces, the areas of most concern to the designer are the clearances around the table and the number of people a table of a particular size can accommodate. The clearance between the edge of the table and the wall or any other physical obstruction must at the very least accommodate two elements: (1) the space occupied by the chair and (2) the maximum body breadth of a person of a larger body size as he circulates between the chair and the wall. In dealing with the space occupied by the chair, it should be noted that its position, relative to the edge of the table, will change several times during the course of a meal. Towards the end of a meal, perhaps while the person is engaged in informal conversation or in an effort to change body posture, the chair may be extended farther from the table. As a person leaves the table, the chair may be located even farther away. Comfortable clearance should assume the chair to be at its farthest distance from the table.

Users Review

From reader reviews:

Charles Trask:

With other case, little individuals like to read book Human Dimension & Interior Space: A Source Book of Design Reference Standards. You can choose the best book if you love reading a book. Providing we know about how is important the book Human Dimension & Interior Space: A Source Book of Design Reference Standards. You can add knowledge and of course you can around the world by just a book. Absolutely right, simply because from book you can learn everything! From your country till foreign or abroad you may be known. About simple point until wonderful thing you can know that. In this era, we can easily open a book as well as searching by internet unit. It is called e-book. You should use it when you feel bored to go to the library. Let's go through.

Leticia Bennet:

What do you ponder on book? It is just for students since they're still students or the idea for all people in the world, what the best subject for that? Simply you can be answered for that problem above. Every person has diverse personality and hobby for every other. Don't to be compelled someone or something that they don't wish do that. You must know how great along with important the book Human Dimension & Interior Space: A Source Book of Design Reference Standards. All type of book could you see on many resources. You can look for the internet options or other social media.

Harry Thomas:

Do you like reading a e-book? Confuse to looking for your favorite book? Or your book ended up being rare? Why so many question for the book? But any kind of people feel that they enjoy with regard to reading. Some people likes reading through, not only science book but also novel and Human Dimension & Interior Space: A Source Book of Design Reference Standards as well as others sources were given understanding for you. After you know how the truly great a book, you feel desire to read more and more. Science reserve was created for teacher as well as students especially. Those ebooks are helping them to include their knowledge. In various other case, beside science book, any other book likes Human Dimension & Interior Space: A Source Book of Design Reference Standards to make your spare time considerably more colorful. Many types of book like here.

Keith Lugo:

As a scholar exactly feel bored in order to reading. If their teacher expected them to go to the library or to make summary for some e-book, they are complained. Just very little students that has reading's spirit or real their pastime. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading critically. Any students feel that reading through is not important, boring in addition to can't see colorful photographs on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Human Dimension & Interior Space: A Source Book of Design Reference Standards can make you truly feel more interested to read.
