Project Management for the Oil and Gas Industry: A World System Approach (Industrial Innovation Series) By Adedeji B. Badiru, Samuel O. Osisanya

Project management for oil and gas projects comes with a unique set of challenges that include the management of science, technology, and engineering aspects. Underlining the specific issues involved in projects in this field, **Project Management for the Oil and Gas Industry: A World System Approach** presents step-by-step application of project management techniques. Using the Project Management Body of Knowledge (PMBOK®) framework from the Project Management Institute (PMI) as the platform, the book provides an integrated approach that covers the concepts, tools, and techniques for managing oil and gas projects.

The authors discuss specialized tools such as plan, do, check, act (PDCA); define, measure, analyze, improve, control (DMAIC); suppliers, inputs, process, outputs, customers (SIPOC); design, evaluate, justify, integrate (DEJI); quality function deployment (QFD); affinity diagrams; flowcharts; Pareto charts; and histograms. They also discuss the major activities in oil and gas risk assessment, such as feasibility studies, design, transportation, utility, survey works, construction, permanent structure works, mechanical and electrical installations, and maintenance.

Strongly advocating a world systems approach to managing oil and gas projects and programs, the book covers quantitative and qualitative techniques. It addresses technical and managerial aspects of projects and illustrates the concepts with case examples of applications of project management tools and techniques to real-life project scenarios that can serve as lessons learned for best practices. An in-depth examination of project management for oil and gas projects, the book is a handbook for professionals in the field, a guidebook for technical consultants, and a resource for students.

Editorial Review

Users Review

From reader reviews:

Ruth Aguilar:

This book untitled Project Management for the Oil and Gas Industry: A World System Approach (Industrial Innovation Series) to be one of several books that will best seller in this year, this is because when you read this reserve you can get a lot of benefit into it. You will easily to buy this particular book in the book shop or you can order it by way of online. The publisher on this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Cell phone. So there is no reason to you to past this book from your list.

Donna Kerns:

The book with title Project Management for the Oil and Gas Industry: A World System Approach (Industrial Innovation Series) has a lot of information that you can understand it. You can get a lot of benefit after read this book. This kind of book exist new expertise the information that exist in this reserve represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. This book will bring you with new era of the the positive effect. You can read the e-book with your smart phone, so you can read this anywhere you want.

Paula Mayo:

Is it a person who having spare time and then spend it whole day through watching television programs or just telling lies on the bed? Do you need something new? This Project Management for the Oil and Gas Industry: A World System Approach (Industrial Innovation Series) can be the respond to, oh how comes? It's a book you know. You are so out of date, spending your time by reading in this completely new era is common not a geek activity. So what these publications have than the others?

Karen Garcia:

A lot of guide has printed but it differs from the others. You can get it by online on social media. You can choose the very best book for you, science, comedy, novel, or whatever by searching from it. It is identified as of book Project Management for the Oil and Gas Industry: A World System Approach (Industrial Innovation Series). Contain your knowledge by it. Without making the printed book, it might add your knowledge and make a person happier to read. It is most important that, you must aware about publication. It can bring you from one spot to other place.
