Spark for Data Science By Bikramaditya Singhal, Srinivas Duvvuri

Key Features

- Perform data analysis and build predictive models on huge datasets that leverage Apache Spark
- Learn to integrate data science algorithms and techniques with the fast and scalable computing features of Spark to address big data challenges
- Work through practical examples on real-world problems with sample code snippets

Book Description

This is the era of Big Data and Internet of Things! Big Data implies big innovation and enables a competitive advantage for businesses. Apache Spark was designed to perform Big Data analytics at scale, and so Spark is equipped with the necessary algorithms and supports multiple programming languages.

Whether you are a technologist, a data scientist, or a beginner to Big Data analytics, this book will provide you with all the skills necessary to perform statistical data analysis, data visualization, predictive modeling, and build scalable data products or solutions using Python, Scala, and R.

With ample case studies and real-world examples, Spark for Data Science will help you ensure the successful execution of your data science projects.

What you will learn

- Consolidate, clean, and transform your data acquired from various data sources
- Perform statistical analysis of data to find hidden insights
- Explore graphical techniques to see what your data looks like
- Use machine learning techniques to build predictive models
- Build scalable data products and solutions
- Start programming using the RADD API
- Become an expert by improving your data analytical skills

About the Author

Bikramaditya Singhal works as a Senior Data Science Analyst with Broadridge Financial Solutions (India) Pvt. Ltd. He has over 6 years of experience in statistical analysis, machine learning, and also in developing, designing, and architecting data-driven solutions.

His passion for technology and applied mathematics propelled him to pursue a career in data science. He is a strong believer in continuous innovation. He worked with Microsoft India and cofounded a company that provides data-driven insights to clients globally.

He has been a speaker at various conferences and meetups on data science, machine learning, and Apache Spark. His current skillset includes statistical data analysis, machine learning, R, Python, Scala, and ETL tools. With a unique blend of science as well as the technology aspect of Big Data, he has been instrumental in providing solutions to Big Data analytics problems.

Srinivas Duvvuri is currently heading the Fixed Income Suite of products at Broadridge India, and is also a principal member of the Broadridge Technology Council. In addition, he is involved in setting up the Big Data COE at Broadridge. He has over 22 years of experience in software product development and engineering complex, high-performance, scalable, multi-platform software solutions based on cutting edge technologies.

His experience predominantly spans product development in multiple domains including financial services, infrastructure management, OLAP, telecom billing, and customer care. Prior to Broadridge, he held leadership positions at a start-up and at leading IT majors such as CA, Hyperion (Oracle), and Globalstar, and also has a patent in Relational OLAP. Srinivas has a B.Tech in Aeronautics Engineering and an M.Tech in Computer Science, from IIT, Madras.

Editorial Review

About the Author

Srinivas Duvvuri Srinivas Duvvuri is currently Senior Vice President Development, heading the development teams for Fixed Income Suite of products at Broadridge Financial Solutions (India) Pvt Ltd. In addition, he also leads the Big Data and Data Science COE and is the principal member of the Broadridge India Technology Council. He is self learnt Data Scientist. The Big Data /Data Science COE in the past 3 years, has successfully completed multiple POC's and some of the use cases are moving towards production deployment. He has over 25+ years of experience in software product development. His experience spans predominantly in product development in, multiple domains Financial Services, Infrastructure Management, OLAP, Telecom Billing and Customer Care, CAD/CAM. Prior to Broadridge, he s held leadership positions at a Startup and leading IT majors such as CA, Hyperion (Oracle), Globalstar. He has a patent in Relational OLAP. Srinivas loves to teach and mentor budding Engineers. He has established strong Academic connect and interacts with a host of educational institutions, He is an active speaker in various conferences, summits and meetups on topics such as Big data, Data Science Srinivas is a B.Tech in Aeronautical Engineering and M.Tech in Computer Science, from IIT, Madras.

Bikramaditya Singhal Bikramaditya Singhal is a data scientist with about 7 years of industry experience. He is an expert in statistical analysis, predictive analytics, machine learning, Bitcoin, Blockchain, and programming in C, R, and Python. He has extensive experience in building scalable data analytics solutions in many industry sectors. He also has an active interest on industrial IoT, machine to machine communication, decentralized computation through Blockchain and Artificial Intelligence. Bikram currently leads the data science team of Digital Enterprise Solutions' group at Tech Mahindra Ltd. He also worked in companies such as Microsoft India, Broadridge, Chelsio Communications and also cofounded a company named Mund Consulting' which focused on Big Data analytics. Bikram is an active speaker in various conferences, summits and meetups on topics such as big data, data science, IIoT and Blockchain.

Users Review

From reader reviews:

Charles Tapia:

In this 21st century, people become competitive in each and every way. By being competitive today, people have do something to make them survives, being in the middle of the crowded place and notice through surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yeah, by reading a e-book your ability to survive improve then having chance to remain than other is high. For you personally who want to start reading a book, we give you this Spark for Data Science book as beginning and daily reading book. Why, because this book is usually more than just a book.

Alberto Benson:

Often the book Spark for Data Science will bring that you the new experience of reading the book. The author style to elucidate the idea is very unique. When you try to find new book to see, this book very appropriate to you. The book Spark for Data Science is much recommended to you to read. You can also get the e-book in the official web site, so you can quicker to read the book.

William Pak:

Spark for Data Science can be one of your basic books that are good idea. Many of us recommend that straight away because this e-book has good vocabulary that will increase your knowledge in words, easy to understand, bit entertaining however delivering the information. The writer giving his/her effort to place every word into enjoyment arrangement in writing Spark for Data Science but doesn't forget the main stage, giving the reader the hottest as well as based confirm resource data that maybe you can be among it. This great information can certainly drawn you into completely new stage of crucial imagining.

Matthew Ibarra:

Reading a book make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is written or printed or highlighted from each source in which filled update of news. In this modern era like today, many ways to get information are available for you actually. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just seeking the Spark for Data Science when you essential it?
