

# The SAGE Handbook of Multilevel Modeling

*From SAGE Publications Ltd*

## **The SAGE Handbook of Multilevel Modeling** From SAGE Publications Ltd

In this important new Handbook, the editors have gathered together a range of leading contributors to introduce the theory and practice of multilevel modeling.

The Handbook establishes the connections in multilevel modeling, bringing together leading experts from around the world to provide a roadmap for applied researchers linking theory and practice, as well as a unique arsenal of state-of-the-art tools. It forges vital connections that cross traditional disciplinary divides and introduces best practice in the field.

- Part I establishes the framework for estimation and inference, including chapters dedicated to notation, model selection, fixed and random effects, and causal inference.
- Part II develops variations and extensions, such as nonlinear, semiparametric and latent class models.
- Part III includes discussion of missing data and robust methods, assessment of fit and software.
- Part IV consists of exemplary modeling and data analyses written by methodologists working in specific disciplines.

Combining practical pieces with overviews of the field, this Handbook is essential reading for any student or researcher looking to apply multilevel techniques in their own research.

## **Editorial Review**

### Review

...This handbook attempts to cover an intricate and multifaceted topic and delivers what is expected of it very successfully and at good cost considering its all-purpose usefulness. This handbook is a must-have consultation book for researchers interested in multilevel modelling from a wide variety of disciplines, if not all. (Patricio Troncosco, Cathie Marsh Institute for Social Research, The University of Manchester)

### About the Author

**Jeffrey S. Simonoff** is Professor of Statistics at the NYU Stern School of Business. He is a Fellow of the American Statistical Association, a Fellow of the Institute of Mathematical Statistics, and an Elected Member of the International Statistical Institute. He is author or coauthor of roughly 100 articles and five books on the theory and applications of statistics.

**Brian D. Marx** is a Professor of Statistics at Louisiana State University. His main research interests include smoothing, ill-conditioned regression problems, high-dimensional chemometric applications; and he has numerous publications on these topics. He is past president of the *Statistical Modelling Society*, and is currently member of the Executive Committee of this same international professional society. He is coauthor of the book *Regression: Models, Methods, and Applications*, as well as, the co-editor of the *Sage Handbook on Multilevel Modelling*.

## **Users Review**

### **From reader reviews:**

#### **John Folsom:**

Book is to be different for each and every grade. Book for children until finally adult are different content. As you may know that book is very important for people. The book The SAGE Handbook of Multilevel Modeling was making you to know about other know-how and of course you can take more information. It is very advantages for you. The guide The SAGE Handbook of Multilevel Modeling is not only giving you considerably more new information but also being your friend when you experience bored. You can spend your spend time to read your reserve. Try to make relationship with all the book The SAGE Handbook of Multilevel Modeling. You never experience lose out for everything should you read some books.

#### **Lamont Williams:**

As people who live in often the modest era should be revise about what going on or data even knowledge to make these people keep up with the era that is always change and progress. Some of you maybe will update themselves by reading books. It is a good choice in your case but the problems coming to you is you don't know what type you should start with. This The SAGE Handbook of Multilevel Modeling is our recommendation to make you keep up with the world. Why, since this book serves what you want and wish in this era.

**Richard Dike:**

Do you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Make an effort to pick one book that you never know the inside because don't judge book by its include may doesn't work this is difficult job because you are scared that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer can be The SAGE Handbook of Multilevel Modeling why because the fantastic cover that make you consider regarding the content will not disappoint an individual. The inside or content is actually fantastic as the outside as well as cover. Your reading 6th sense will directly direct you to pick up this book.

**Michael Robinson:**

A lot of people said that they feel bored when they reading a book. They are directly felt it when they get a half regions of the book. You can choose typically the book The SAGE Handbook of Multilevel Modeling to make your reading is interesting. Your own personal skill of reading expertise is developing when you similar to reading. Try to choose basic book to make you enjoy to study it and mingle the opinion about book and reading through especially. It is to be 1st opinion for you to like to available a book and examine it. Beside that the publication The SAGE Handbook of Multilevel Modeling can to be your brand-new friend when you're feel alone and confuse in doing what must you're doing of their time.
