
Biochemistry: A Short Course

By John L. Tymoczko, Jeremy M. Berg, Lubert Stryer

Biochemistry: A Short Course By John L. Tymoczko, Jeremy M. Berg, Lubert Stryer

Derived from the classic text originated by Lubert Stryer and continued by John Tymoczko and Jeremy Berg, *Biochemistry: A Short Course* focuses on the major topics taught in a one-semester biochemistry course. With its short chapters and relevant examples, it’s uniquely effective in helping students see the connections between the biochemistry they’re studying and their own lives.

This new edition takes into account recent discoveries and advances that have changed how we think about the fundamental concepts in biochemistry and human health. A number of new interactive features are designed to help instructors create a more active environment in the classroom. Those new resources are found in LaunchPad, the third edition’s dedicated version of W.H. Freeman’s breakthrough online course space.

Biochemistry: A Short Course By John L. Tymoczko, Jeremy M. Berg, Lubert Stryer Bibliography

- Rank: #1811 in Books
- Brand: W. H. Freeman
- Published on: 2015-04-24
- Original language: English
- Number of items: 1
- Dimensions: 10.82" h x 1.27" w x 8.59" l, 3.40 pounds
- Binding: Paperback
- 800 pages

Editorial Review

About the Author

John L. Tymoczko is Towsley Professor of Biology at Carleton College, where he has taught since 1976. He currently teaches Biochemistry, the Metabolic Basis
of Human Disease, Oncogenes and the Molecular Biology of Cancer, and Exercise Biochemistry and co-teaches an introductory course, Energy Flow in Biological
Systems. Professor Tymoczko received his B.A. from the University in Chicago in 1970 and his Ph.D. in Biochemistry from the University of Chicago with
Shutsung Liao at the Ben May Institute for Cancer Research in 1973. He then held a postdoctoral position with Hewson Swift of the Department of Biology at
the University of Chicago. The focus of his research has been on steroid receptors, ribonucleoprotein particles, and proteolytic processing enzymes.

Jeremy M. Berg received his B.S. and M.S. degrees in Chemistry from Stanford (where he did research with Keith Hodgson and Lubert Stryer) and his Ph.D. in Chemistry from Harvard with Richard Holm. He then completed a postdoctoral fellowship with Carl Pabo in Biophysics at Johns Hopkins University School of Medicine. He was an Assistant Professor in the Department of Chemistry at Johns Hopkins from 1986 to 1990. He then moved to Johns Hopkins University School of Medicine as Professor and Director of the Department of Biophysics and Biophysical Chemistry, where he remained until 2003. He then became Director of the National Institute of General Medical Sciences at the National Institutes of Health. In 2011, he moved to the University of Pittsburgh where he is now Professor of Computational and Systems Biology and Pittsburgh Foundation Chair and Director of the Institute for Personalized Medicine. He served as President of the American Society for Biochemistry and Molecular Biology from 2011-2013. He is a Fellow of the American Association for the Advancement of Science and a member of the Institute of Medicine of the National Academy of Sciences. He received the American Chemical Society Award in Pure Chemistry (1994) and the Eli Lilly Award for Fundamental Research in Biological Chemistry (1995), was named Maryland Outstanding Young Scientist of the Year (1995), received the Harrison Howe Award (1997), and received public service awards from the Biophysical Society, the American Society for Biochemistry and Molecular Biology, the American Chemical Society, and the American Society for Cell Biology. He also received numerous teaching awards, including the W. Barry Wood Teaching Award (selected by medical students), the Graduate Student Teaching Award, and the Professor s Teaching Award for the Preclinical Sciences. He is coauthor, with Stephen J. Lippard, of the textbook *Principles of Bioinorganic Chemistry*.
Lubert Stryer is Winzer Professor of Cell Biology, Emeritus, in the School of Medicine and Professor of Neurobiology, Emeritus, at Stanford University,
where he has been on the faculty since 1976. He received his M.D. from Harvard Medical School. Professor Stryer has received many awards for his research on the
interplay of light and life, including the Eli Lilly Award for Fundamental Research in Biological Chemistry, the Distinguished Inventors Award of the Intellectual
Property Owners Association, and election to the National Academy of Sciences and the American Philosophical Society. He was awarded the National Medal
of Science in 2006. The publication of his first edition of *Biochemistry* in 1975 transformed the teaching of biochemistry."

Users Review

From reader reviews:

Susan Arnold:

What do you think about book? It is just for students because they are still students or the item for all people in the world, exactly what the best subject for that? Merely you can be answered for that problem above. Every person has distinct personality and hobby for each and every other. Don't to be pushed someone or something that they don't would like do that. You must know how great and important the book Biochemistry: A Short Course. All type of book could you see on many methods. You can look for the internet resources or other social media.

Carol Witt:

Do you one of people who can't read enjoyable if the sentence chained inside straightway, hold on guys that aren't like that. This Biochemistry: A Short Course book is readable by simply you who hate the perfect word style. You will find the information here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to supply to you. The writer associated with Biochemistry: A Short Course content conveys thinking easily to understand by many people. The printed and e-book are not different in the articles but it just different available as it. So , do you nevertheless thinking Biochemistry: A Short Course is not loveable to be your top checklist reading book?

Robert Denney:

This Biochemistry: A Short Course is great guide for you because the content and that is full of information for you who also always deal with world and also have to make decision every minute. This specific book reveal it details accurately using great organize word or we can say no rambling sentences in it. So if you are read this hurriedly you can have whole info in it. Doesn't mean it only will give you straight forward sentences but challenging core information with beautiful delivering sentences. Having Biochemistry: A Short Course in your hand like getting the world in your arm, facts in it is not ridiculous just one. We can say that no reserve that offer you world inside ten or fifteen tiny right but this guide already do that. So , this is certainly good reading book. Hi Mr. and Mrs. stressful do you still doubt in which?

Doris Garcia:

Do you like reading a e-book? Confuse to looking for your best book? Or your book ended up being rare? Why so many question for the book? But any people feel that they enjoy to get reading. Some people likes reading, not only science book and also novel and Biochemistry: A Short Course as well as others sources were given know-how for you. After you know how the great a book, you feel want to read more and more. Science guide was created for teacher as well as students especially. Those publications are helping them to include their knowledge. In additional case, beside science reserve, any other book likes Biochemistry: A Short Course to make your spare time much more colorful. Many types of book like this.
