**Grabb's Encyclopedia of Flaps: Upper Extremities, Torso, Pelvis, and Lower Extremities** By Berish Strauch, Luis O. Vasconez, Charles K. Herman, Bernard T. Lee MD

Still the most comprehensive reference available on surgical flaps, this classic text remains your go-to source for practical, authoritative guidance on achieving the best possible outcomes for your patients. The second volume in the thoroughly revised 4th Edition combines the previous edition's volumes two and three into one all-new, full-color format that greatly enhances its visual appeal and usefulness in your everyday practice. Dozens of internationally recognized experts describe every clinical proven flap option available for repairing both routine and unusual problems, lavishly illustrated with clinical photographs and diagrams of anatomy, blood supply, flap design, and operative procedures.

Extensively indexed and organized by anatomic region, chapters follow a logical format that clearly presents all the information you need to know: indications, anatomy, flap design and dimensions, operative technique, clinical results, and summary. This comprehensive, clinically relevant information allows you to select the best flaps for safe, predictable, and aesthetically desirable results for every patient.
