Combinatorial systems (wheels) with guaranteed wins for pick-5 lotteries including Euromillions and the Mega lotteries By Iliya Bluskov

This book is Dr. Bluskov's newest installment on entertaining lotto strategies, with focus on PICK-5 lotteries. The book covers **any pick-5 lottery in the world** (a lottery where the main draw has 5 numbers), for example, lotteries such as 5/25, 5/35, 5/39, 5/47, etc., including Mega lotteries such as Powerball, Mega Millions, EuroMillions, Thunderball, etc. It is a book for players or groups of players, who want to **play more than five numbers** and more tickets in a well-organized, balanced, and entertaining way. The author has used advanced methods of **combinatorics and optimization** to design the **most economical lottery system (wheel)** for any given guarantee. Each of the explicitly given systems in his book comes with a **complete table of possible wins**. The lottery player will find systems with **double and multiple guarantees**, excellent navigational tools and presentation. This book once again defeats the common belief that the lottery is a boring game and that the only excitement comes from watching the draw and matching some of the winning numbers. It shows that choosing the right way of playing your numbers, assessing the possible wins and filling the tickets can be as entertaining as a trip to Las Vegas! Players who are interested in lotto systems for PICK-6 lotteries can check Dr. Bluskov's pick-6 book titled Combinatorial Lottery Systems (Wheels) with Guaranteed Wins (also at Amazon).

Editorial Review

Review

In his **new book**, Professor Bluskov presents a collection of exquisite **pick-5 lotto systems** to the attention of lotto players and syndicates from around the world. A total of 126 current world record least expensive systems for a broad range of guarantees are presented. Professor Bluskov's follows the tradition from his pick-6 book and offers the newest and best on **lotto systems (wheels)**, this time for pick-5 lotteries, including Mega Lotteries such as Powerball, Mega Millions, EuroMillions and Thunderball. It is a book of interest to every lottery player or a group of players who wish to play their numbers in an organized and balanced way. Lottery systems (wheels) **guarantee wins** in the same way a single ticket does while allowing playing with many numbers (7,8,9,10,11,12,13,14,... etc.) For instance, a single ticket guarantees a 4-win if four of the player's numbers are drawn. A lottery system is a well-organized set of tickets, giving the same guarantee, while allowing the players to use as many numbers as they wish. For example, system #5 from the book guarantees a 4-win whenever four of the player's 10 numbers are drawn; system #6 guarantees a 4-win whenever four of the player's 11 numbers are drawn, etc. Systems with **many other guarantees** are presented in this **excellent strategy book**. Each system has been constructed by Dr. Bluskov's new techniques of combinatorial and computer **optimization**, and, therefore, gives the most **economical way** of playing for a certain guaranteed win. All of these systems are **world records** in terms of performance (achieving certain guarantee in the **minimum possible** number of tickets). The book is quite unique; it is the only one on the subject, written by a mathematician and a lottery expert and we believe it is the best one in existence. The book offers a huge number of improvements in the area of classical lottery systems. Many of its features are completely new for the genre, for example, **systems with double and multiple guarantees** and **tables of possible wins**. Other unique features include the presentation and organization of the material: Each system appears as a separate article, including a **table of all possible wins** comments on various characteristics of the system, such as **minimality**, balance and density; and the system itself. The book provides the tools to make playing the lottery as **entertaining** as playing a table game and gives the player strategies to attack the jackpot in a balanced and well-organized way. No mathematical knowledge is needed to either play or understand the lottery systems, which makes the book **accessible** to virtually every lottery player or a group of players. --From the publisher

About the Author

The author has worked as a freelance writer for a number of lottery publications in Europe and North America, and has spent many years in research in Combinatorics, a branch of Mathematics, which, among other things, deals with combinatorial lottery systems (also called coverings in Combinatorics). He holds several academic degrees, including Ph.D. in Mathematics, and works as a university professor. Dr. Bluskov has written over 20 research papers related to lotteries and over 200 publications on lottery systems. The objects presented in his book originate from the most recent research in the area, and are based on his expert knowledge of the subject.

Users Review

From reader reviews:

Kathryn Mullins:

In this 21st one hundred year, people become competitive in each and every way. By being competitive

currently, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice by simply surrounding. One thing that often many people have underestimated the item for a while is reading. Yep, by reading a guide your ability to survive improve then having chance to stay than other is high. For yourself who want to start reading some sort of book, we give you that Combinatorial systems (wheels) with guaranteed wins for pick-5 lotteries including Euromillions and the Mega lotteries book as starter and daily reading reserve. Why, because this book is more than just a book.

Tom Rivera:

This book untitled Combinatorial systems (wheels) with guaranteed wins for pick-5 lotteries including Euromillions and the Mega lotteries to be one of several books which best seller in this year, here is because when you read this e-book you can get a lot of benefit in it. You will easily to buy this particular book in the book shop or you can order it through online. The publisher of the book sells the e-book too. It makes you easier to read this book, because you can read this book in your Smart phone. So there is no reason to you to past this publication from your list.

Ester Beckles:

In this era globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of recommendations to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. Often the book that recommended to you personally is Combinatorial systems (wheels) with guaranteed wins for pick-5 lotteries including Euromillions and the Mega lotteries this e-book consist a lot of the information from the condition of this world now. This particular book was represented so why is the world has grown up. The words styles that writer value to explain it is easy to understand. Often the writer made some exploration when he makes this book. That's why this book ideal all of you.

Donald Purcell:

Is it a person who having spare time and then spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something new? This Combinatorial systems (wheels) with guaranteed wins for pick-5 lotteries including Euromillions and the Mega lotteries can be the reply, oh how comes? A book you know. You are therefore out of date, spending your time by reading in this brand new era is common not a geek activity. So what these books have than the others?
