Essential Radio Astronomy (Princeton Series in Modern Observational Astronomy) By James J. Condon, Scott M. Ransom

Essential Radio Astronomy is the only textbook on the subject specifically designed for a one-semester introductory course for advanced undergraduates or graduate students in astronomy and astrophysics. It starts from first principles in order to fill gaps in students' backgrounds, make teaching easier for professors who are not expert radio astronomers, and provide a useful reference to the essential equations used by practitioners.

This unique textbook reflects the fact that students of multiwavelength astronomy typically can afford to spend only one semester studying the observational techniques particular to each wavelength band. *Essential Radio Astronomy* presents only the most crucial concepts—succinctly and accessibly. It covers the general principles behind radio telescopes, receivers, and digital backends without getting bogged down in engineering details. Emphasizing the physical processes in radio sources, the book's approach is shaped by the view that radio astrophysics owes more to thermodynamics than electromagnetism.

Proven in the classroom and generously illustrated throughout, *Essential Radio Astronomy* is an invaluable resource for students and researchers alike.

- The only textbook specifically designed for a one-semester course in radio astronomy
- Starts from first principles
- Makes teaching easier for astronomy professors who are not expert radio astronomers
- Emphasizes the physical processes in radio sources
- Covers the principles behind radio telescopes and receivers
- Provides the essential equations and fundamental constants used by practitioners
- Supplementary website includes lecture notes, problem sets, exams, and links to interactive demonstrations
- An online illustration package is available to professors

Editorial Review

Users Review

From reader reviews:

Earline Martin:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite publication and reading a publication. Beside you can solve your long lasting problem; you can add your knowledge by the reserve entitled Essential Radio Astronomy (Princeton Series in Modern Observational Astronomy). Try to face the book Essential Radio Astronomy (Princeton Series in Modern Observational Astronomy) as your friend. It means that it can to get your friend when you feel alone and beside those of course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you considerably more confidence because you can know almost everything by the book. So , let's make new experience as well as knowledge with this book.

Gary Ackley:

Do you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you find out the inside because don't evaluate book by its protect may doesn't work the following is difficult job because you are frightened that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer is usually Essential Radio Astronomy (Princeton Series in Modern Observational Astronomy) why because the fantastic cover that make you consider concerning the content will not disappoint an individual. The inside or content is definitely fantastic as the outside or perhaps cover. Your reading sixth sense will directly direct you to pick up this book.

Shane Bodine:

Is it anyone who having spare time subsequently spend it whole day through watching television programs or just lying down on the bed? Do you need something new? This Essential Radio Astronomy (Princeton Series in Modern Observational Astronomy) can be the response, oh how comes? A book you know. You are and so out of date, spending your extra time by reading in this completely new era is common not a nerd activity. So what these publications have than the others?

Laree Drummond:

That e-book can make you to feel relax. This particular book Essential Radio Astronomy (Princeton Series in Modern Observational Astronomy) was colorful and of course has pictures around. As we know that book Essential Radio Astronomy (Princeton Series in Modern Observational Astronomy) has many kinds or type. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and

think you are the character on there. Therefore , not at all of book are generally make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you and try to like reading which.
