Editorial Review

Review

The LED Grow Book, is an illuminating read. The author, Christopher Sloper, who shares insights gained from years of researching and growing indoors with LED grow lights, doesn't simply shine the light on how LED lights work, how to pick one and how to use it; the second half outlines everything you need to know to create a thriving indoor garden. Sloper's practical, conversational writing style makes it easy to follow for new gardeners, and is also an enjoyable read for advanced growers looking for specifics about growing with LED lights.
