Editorial Review

Review

"Bravo! All math teachers will find a resource that offers lessons and activities that help them provide meaningful instruction while making mathematics more enjoyable to students. Each lesson utilizes many research-based strategies and are based on NCTM standards for Grades 2 and 3. They give teachers the structure to plan fun-filled, meaningful lessons of their own." (Dixon D. Van Hook, Math Coach 2009-07-01)

"An excellent resource for teachers looking for hands-on activities that help students develop a deeper understanding of mathematic concepts. Sousa provides a plethora of activities correlated to the NCTM standards and that follow the structure of an effective lesson design. Whether you are a seasoned teacher looking for activities to add to your repertoire or a new teacher just building your library of resources, this book is an essential planning tool." (Holly Savoie, Third-Grade Teacher 2009-07-01)

About the Author

David A. Sousa, EdD, an international consultant in educational neuroscience, has written 16 books for educators and parents on ways of using brain research to improve teaching and learning. He has conducted workshops for more than two hundred thousand educators in hundreds of school districts on brain research and science education at the pre-K to Grade 12 and university levels. He has presented at national conventions of educational organizations and to regional and local school districts across the United States, Canada, Europe, Australia, New Zealand, and Asia.

Dr. Sousa has a bachelor of science degree in chemistry from Bridgewater (Massachusetts) State University, a master of arts degree in teaching science from Harvard University, and a doctorate from Rutgers University. His teaching experience covers all levels. He has taught high school science and has served as a K–12 director of science, a supervisor of instruction, and a district superintendent in New Jersey schools. He has been an adjunct professor of education at Seton Hall University and at Rutgers University. A past president of the National Staff Development Council (now called Learning Forward), Dr. Sousa has edited science books and published numerous articles in leading educational journals on staff development, science education, and brain research. He has received awards from professional associations, school districts, and Bridgewater State University (Distinguished Alumni Award), and several honorary doctorates for his commitment and contributions to research, staff development, and science education. He has been interviewed on the NBC Today show and on National Public Radio about his work with schools using brain research. He makes his home in south Florida.

Users Review

From reader reviews:

Sherry Spears:

The book Brain-Compatible Activities for Mathematics, Grades 2-3 can give more knowledge and also the

precise product information about everything you want. So just why must we leave the best thing like a book Brain-Compatible Activities for Mathematics, Grades 2-3? A number of you have a different opinion about publication. But one aim in which book can give many info for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or information that you take for that, you may give for each other; it is possible to share all of these. Book Brain-Compatible Activities for Mathematics, Grades 2-3 has simple shape however, you know: it has great and large function for you. You can look the enormous world by start and read a book. So it is very wonderful.

William Roger:

The publication with title Brain-Compatible Activities for Mathematics, Grades 2-3 includes a lot of information that you can find out it. You can get a lot of advantage after read this book. That book exist new understanding the information that exist in this publication represented the condition of the world at this point. That is important to yo7u to understand how the improvement of the world. This kind of book will bring you with new era of the internationalization. You can read the e-book in your smart phone, so you can read the item anywhere you want.

Jacqueline Thompson:

Do you have something that that suits you such as book? The reserve lovers usually prefer to opt for book like comic, limited story and the biggest you are novel. Now, why not seeking Brain-Compatible Activities for Mathematics, Grades 2-3 that give your satisfaction preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the opportunity for people to know world a great deal better then how they react in the direction of the world. It can't be stated constantly that reading practice only for the geeky particular person but for all of you who wants to always be success person. So , for every you who want to start reading through as your good habit, you are able to pick Brain-Compatible Activities for Mathematics, Grades 2-3 become your starter.

Anne Young:

A lot of guide has printed but it is unique. You can get it by world wide web on social media. You can choose the best book for you, science, amusing, novel, or whatever by means of searching from it. It is identified as of book Brain-Compatible Activities for Mathematics, Grades 2-3. Contain your knowledge by it. Without leaving behind the printed book, it may add your knowledge and make a person happier to read. It is most crucial that, you must aware about reserve. It can bring you from one location to other place.
