Editorial Review

Review

Building Automation Systems A to Z, provides an entertaining and informative overview of a BAS. This book is structured in a way that a person at any skill level can easily navigate to the section and information they need.

Phil's teaching style is straight forward and easy to understand; his book provides a solid foundation and is an excellent resource for anyone in the industry. The training that Phil Zito provides in this book and on his website goes a long way to fill the training void that currently exists in the building automation community.

-Dave Richardson, Service Technician

Building Automation System A to Z is exactly what I was hoping it would be, a solid introduction to the fundamentals of BAS.

I come from a mechanical engineering and, to a lesser extent, IT background. I am highly interested in BAS, but had no idea where to start my learning venture.

Phil Zito's book proved to be exactly what I was looking for. It provides a solid foundation of what BAS is and its components. He then further introduces you to electrical and IT fundamentals, BAS maintenance, procurement, upgrading, BAS management, system integration and even analytics.

After reading his book, I feel much more confident in any situation wherein I may need to know some fundamental BAS concepts (such as an interview).

If you need a solid jumping off point or just need to expand you current base knowledge of building automation systems, I highly recommend you read this book.

-Jeff Wrigley, IT Systems Administrator

Phil Zito has fully captured the building automation systems business and its place in the building construction industry in his new book Building Automation Systems A to Z.

From pneumatic controls to the emerging technologies of IoT and cloud computing, Building Automation Systems A to Z covers all aspect of our industry.

This is an excellent primer if you're new building automation and controls. And a wonderful reminder for experienced individuals on what a complex and technology-focused industry we work in.

-Kevin Callahan, Product Owner & Evangelist, Alerton Dealer Business

As a primer, Phil Zito's "Building Automation A to Z" offers a thorough introduction to BAS systems which are complex, difficult to install, maintain, and upgrade with many moving parts.

The book offers a sweeping overview of the main concepts that would interest a building owner seeking a tighter, money-saving operation or someone thinking about a career as a building controls technician or contractor.

Phil shares insights, knowledge, terminology, and concepts in easy-going writing style including subjects which are presented with an attitude of "you can do this!"

The author is very dedicated (and it shows!) to passing on years of practical tips to streamline and standardized experience-tested methods which, if adopted, can lead to saving time and preventing expensive downtime.

This book spans a great variety of topics like: purchasing, maintaining, and updating BAS systems with industry observations which are unique and rarely shared in printed form.

Here too, you will find several chapters that focus on: system components; a structured approach to installed systems; upgrading existing systems; an overview of building design, construction and commissioning; IT (information technology) concepts; the buzz surrounding IoT; and career guidance all within its 3xx pages.

This useful book is part of a large multi-media project: teaching the intricacies of building automation. the book and the author's website deliver a comprehensive educational resource accessible to those interested in learning about all aspects and complexity of building automation.

-Eric Anderson, VP, Product Development & Engineering

The book is well written, it keeps the information understandable and not geared towards the scientist. It is educational and entertaining while providing something for people with all levels of experience, from the novice looking for ideas, to the well-seasoned HVAC tech looking to expand his knowledge.

-Rich Lillie Director of Operations

From the Back Cover

Building Automation Systems are complicated. There is so much you need to know and so few resources to turn to. That is why I wrote this book. In Building Automation Systems A to Z you will learn:

- ✓ The in's and outs of BAS
- ✓ How to work with IT professionals on BAS projects
- ✓ Dozens of step-by-step processes to manage, install, upgrade, support, and integrate BAS
- ✓ The truth about analytics, IoT, and systems integration!

This book contains the combined experience of over 100+ years of HVAC and BAS professional knowledge and will help you dramatically shortcut your learning process.

I've spent years learning this information and now you can shortcut the learning process with this all-in-one guide to the fundamentals of BAS.

About the Author

Hi, I'm Phil Zito.

For the past decade, I've worked in the Building Automation field. I've held roles as a Service Technician, Operations Manager, Development Engineer, and most recently the Integration Program Manager for the largest Building Automation System Manufacturer in the world.

For the past decade, I've spent 3 to 4 hours every night studying building automation. It is this experience

that I pass on to my readers.

I love building automation systems!

That's why I run BuildingAutomationMonthly.com the #1 educational site related to Building Automation Systems. Here I teach folks about Building Automation Systems. I run a podcast, videocast, and blog.

I also create courses and books to help folks take their building automation knowledge to the next level.

Users Review

From reader reviews:

Patricia Joyner:

The book with title Building Automation Systems A To Z: How To Survive In A World Full Of Bas contains a lot of information that you can study it. You can get a lot of help after read this book. This particular book exist new expertise the information that exist in this guide represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This book will bring you throughout new era of the internationalization. You can read the e-book with your smart phone, so you can read the item anywhere you want.

Robert Ford:

Don't be worry when you are afraid that this book can filled the space in your house, you will get it in e-book means, more simple and reachable. This Building Automation Systems A To Z: How To Survive In A World Full Of Bas can give you a lot of pals because by you looking at this one book you have point that they don't and make you actually more like an interesting person. That book can be one of one step for you to get success. This guide offer you information that might be your friend doesn't realize, by knowing more than additional make you to be great folks. So , why hesitate? Let me have Building Automation Systems A To Z: How To Survive In A World Full Of Bas.

Amanda Acuna:

Do you like reading a reserve? Confuse to looking for your selected book? Or your book was rare? Why so many issue for the book? But any kind of people feel that they enjoy intended for reading. Some people likes studying, not only science book but novel and Building Automation Systems A To Z: How To Survive In A World Full Of Bas or even others sources were given understanding for you. After you know how the truly amazing a book, you feel need to read more and more. Science guide was created for teacher as well as students especially. Those publications are helping them to increase their knowledge. In different case, beside science reserve, any other book likes Building Automation Systems A To Z: How To Survive In A World Full Of Bas to make your spare time more colorful. Many types of book like here.

Donald Goodman:

What is your hobby? Have you heard this question when you got pupils? We believe that that question was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And you know that little person including reading or as reading through become their hobby. You have to know that reading is

very important and also book as to be the point. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You will find good news or update with regards to something by book. Many kinds of books that can you go onto be your object. One of them is Building Automation Systems A To Z: How To Survive In A World Full Of Bas.
