**Maxillofacial Rehabilitation: Prosthodontic and Surgical Management of Cancer-Related, Acquired, and Congenital Defects of the Head and Neck (Amg All Music Guide)** By Dr John Beumer III, Mark T. Marunick, Salvatore J. Esposito

The rehabilitation of patients with disabilities of the head and neck secondary to acquired and congenital defects continues to be a challenge. Today it is possible to restore most patients to nearly normal form and function, enabling them to lead useful and productive lives. However, successful outcomes require close interaction among many health care disciplines. Given the recent advances in maxillofacial prosthetics and reconstructive surgery, the pace of change in the rehabilitation of oral and facial defects has been far too slow. For example, free tissue transfers have been used throughout the world for the last 20 years to restore bony defects of the mandible, but far too many surgeons fail to understand that it is equally important to restore the bulk and contour of the tongue if the oral functions of speech, mastication, and control of saliva are to be restored. This updated edition with an emphasis on a truly multidisciplinary approach provides the reader with insights into the latest developments in maxillofacial prosthetics, reconstructive surgery, and dental care. New chapters present information on digital technology and tissue engineering, and all chapters have undergone significant revision, reflecting the advances in the use of osseointegrated implants and free vascularized flaps. The reader will take away practical knowledge of state-of-the-art treatment approaches to ensure that patients of the future will no longer assert that the cure was worse than the disease. Contents

1. Oral Management of Patients Treated with Radiation Therapy and/or Chemoradiation J. Beumer III, E. Sung, R. Kagan, K. Lyons, H. Gulbransen, B. Venkatachalam, N. Ghaem-Maghani
2. Rehabilitation of Tongue and Mandibular Defects J. Beumer III, M. Marunick, S. Silverman Jr, N. Garrett, J. Rieger, E. Abemayor, R. Penn, V. Nabili, R. Rezaee, D. Curtis, A. Hannam, R. Nelson, E. Roumanas, E. Freymiller, B. Markowitz
3. Rehabilitation of Maxillary Defects J. Beumer III, M. Marunick, N. Garrett, D.

- Rohner, H. Reintsema, E. Abemayor, R. Penn, V. Nabili, P. Bucher
4. Rehabilitation of Soft Palate Defects S. Esposito, J. Rieger, J. Beumer III
  5. Rehabilitation of Facial Defects J. Beumer III, D. Reisberg, M. Marunick, J. Powers, S. Kiat-amnuay, R. van Oort, Y. Zhao, G. Wu, L. Eversole, H. Cherrick, E. Roumanas, D. Pedroche, T. Baba, J. de Cubber, P. Moy, W. Noorda, G. van Dijk
  6. Rehabilitation of Cleft Lip and Palate and Other Craniofacial Anomalies A. Sharma, T. Chang, L. Brecht, L. Kaban, K. Vergervik
  7. Digital Technology in Maxillofacial Rehabilitation J. Wolfaardt, B. King, R. Bibb, H. Verdonck, J. de Cubber, C. Sensen, J. Soh
  8. Tissue Engineering of Maxillofacial Tissues M. Lee, B. Wu
  9. Psychosocial Perspectives on the Care of Head and Neck Cancer Patients D. Rapkin, N. Garrett
  10. Oral Management of Chemotherapy Patients E. Chung, E. Sung

## **Editorial Review**

### **Review**

This is a very good comprehensive text to have as a reference and has many excellent contributions from many well-known authors. The text can serve any dentist who might see a patient who has had or will have treatment with chemotherapy and radiation therapy and/or has a maxillary or mandibular defect that requires restoration and maintenance. --Robert Schneider, DDS, MS, FACP, - Special Care in Dentistry, May/June 2012

This is a beautifully constructed textbook from start to finish which presents a range of techniques in an accessible and informative manner. A valuable source of referral for anyone involved in maxillofacial rehabilitation, it certainly helps somewhat to diffuse the infamous phrase "the cure was worse than the disease". --D. Brierley, - British Dental Journal, April 2012

This is one of the rare textbooks that I think should be used in the part of the formal educational curriculum (predoctoral, postdoctoral, and continuing) on the dental and surgical management of maxillofacial defects, particularly the section on the irradiated oncology patient. The book is of sufficient importance that readers should be willing to purchase a personal copy, and it should certainly be present in all dental and medical libraries. --Michael D. Turner, DDS, MD, FACS, - Journal of Dental Education, June 2012

## **Users Review**

### **From reader reviews:**

#### **Minerva Gagliano:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite e-book and reading a e-book. Beside you can solve your trouble; you can add your knowledge by the guide entitled Maxillofacial Rehabilitation: Prosthodontic and Surgical Management of Cancer-Related, Acquired, and Congenital Defects of the Head and Neck (Amg All Music Guide). Try to face the book Maxillofacial Rehabilitation: Prosthodontic and Surgical Management of Cancer-Related, Acquired, and Congenital Defects of the Head and Neck (Amg All Music Guide) as your close friend. It means that it can to be your friend when you feel alone and beside regarding course make you smarter than in the past. Yeah, it is very fortunated in your case. The book makes you much more confidence because you can know anything by the book. So , we should make new experience in addition to knowledge with this book.

#### **Charles Owens:**

Have you spare time for the day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a move, shopping, or went to the particular Mall. How about open or read a book called Maxillofacial Rehabilitation: Prosthodontic and Surgical Management of Cancer-Related, Acquired, and Congenital Defects of the Head and Neck (Amg All Music Guide)? Maybe it is to be best activity for you. You understand beside you can

spend your time using your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have some other opinion?

**Dollie Simmons:**

This Maxillofacial Rehabilitation: Prosthodontic and Surgical Management of Cancer-Related, Acquired, and Congenital Defects of the Head and Neck (Amg All Music Guide) is fresh way for you who has curiosity to look for some information given it relief your hunger info. Getting deeper you into it getting knowledge more you know otherwise you who still having tiny amount of digest in reading this Maxillofacial Rehabilitation: Prosthodontic and Surgical Management of Cancer-Related, Acquired, and Congenital Defects of the Head and Neck (Amg All Music Guide) can be the light food in your case because the information inside this particular book is easy to get by means of anyone.
