Modern Cable Television Technology: Video, Voice, and Data Communications (The Morgan Kaufmann Series in Networking) By Walter Ciciora, James Farmer, David Large

NEW EDITION NOW AVAILABLE! ISBN 1-55860-828-1

Based on a tutorial workshop, this book overviews the technical details involved in a cable system. A complete descriptive reference of a cable television system. This book is the most up-to-date and comprehensive reference available on cable television technologies. It covers issues not addressed in any other book such as modern headend design, reliability calculations, modern architecture, and equipment interface.

- * Summarizes key standards including DOCSIS, DVS, NRSS, DSWG, EIA-542, and IS-23
- * Explains digital cable, analog cable, data on cable, telephone on cable, and headend practices
- * Features distribution systems, from drops through fiber optics and covering everything from basic principles to network architectures
- * Includes coverage of digital video compression, digital modulation techniques, subjective video quality expectations, and consumer electronic equipment interface issues

Editorial Review

Review

"This book is required reading for engineers and other technical readers interested in a career in telecommunications, which in the next millenium, will rely heavily upon a cable television infrastructure. It offers the best comprehensive look at cable television technology that I have seen. I congratulate the authors on a job well done.

—Dr. Richard Green, President and CEO, CableLabs

"During my 24 years in the cable television industry, I have not encountered more qualified engineers than Ciciora, Farmer, and Large. I have already learned much from them as colleagues. Now, this combined wealth of technical knowledge is available to everyone."

—William W. Riker

Vice President, Operations and Engineering, The Cable Center, Ex-President, SCTE

"Three of the great minds in the Cable Television Industry have come together to produce an extremely comprehensive and up-to-date reference book on Cable Television technology."

—Tony Werner, Executive Vice President & CTO, TCI

"Three of the brightest technical talents in the cable industry have joined together to write a reference manual on broadband technology. A great resource for training, teaching, or just staying current on technical issues of importance in the cable arena."

—Alex Best, Senior Vice President, Operations and Engineering, Cox Cable Communications

Features

- Summarizes key standards including DOCSIS, DVS, NRSS, DSWG, EIA-542, and IS-23
- Explains digital cable, analog cable, data on cable, telephone on cable, and headend practices
- Features distribution systems, from drops through fiber optics and covering everything from basic principles to network architectures
- Includes coverage of digital video compression, digital modulation techniques, subjective video quality expectations, and consumer electronic equipment interface issues

About the Author

Dr. Ciciora is a Fellow of the IEEE, the SMPTE, and SCTE and serves on the Montreux Television Symposium Executive committee. He is a consultant in Cable, Consumer Electronics, and Telecommunications. He was VP of Technology at Time Warner from 1982 to 1993 after being with Zenith since 1965.

James Farmer is the Chief Technical Officer and Executive Vice President of Quality at ANTEC. A respected industry expert and communicator, Jim is widely published and is active in the National Cable Television Association (NCTA), the Society of Cable Television Engineers (SCTE), and the Institute of Electrical and Electronic Engineers (IEEE), among others.

David Large is a Principal in the consulting firm Media Connections Group. He is a Fellow Member of the SCTE, a Senior Member of the IEEE, a member of the NCTA Engineering Committee and a member of the NCTA/EIA Joint Engineering Committee.

Users Review

From reader reviews:

Mary Kenney:

The book *Modern Cable Television Technology: Video, Voice, and Data Communications* (The Morgan Kaufmann Series in Networking) gives you the sense of being enjoy for your spare time. You can utilize to make your capable considerably more increase. Book can to become your best friend when you getting tension or having big problem using your subject. If you can make reading through a book *Modern Cable Television Technology: Video, Voice, and Data Communications* (The Morgan Kaufmann Series in Networking) to become your habit, you can get a lot more advantages, like add your current capable, increase your knowledge about many or all subjects. You can know everything if you like available and read a publication *Modern Cable Television Technology: Video, Voice, and Data Communications* (The Morgan Kaufmann Series in Networking). Kinds of book are several. It means that, science publication or encyclopedia or others. So , how do you think about this reserve?

Mary Ponce:

As people who live in the particular modest era should be up-date about what going on or info even knowledge to make these individuals keep up with the era that is always change and make progress. Some of you maybe will update themselves by reading through books. It is a good choice to suit your needs but the problems coming to a person is you don't know what one you should start with. This *Modern Cable Television Technology: Video, Voice, and Data Communications* (The Morgan Kaufmann Series in Networking) is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

Alice Winfield:

Modern Cable Television Technology: Video, Voice, and Data Communications (The Morgan Kaufmann Series in Networking) can be one of your beginning books that are good idea. We all recommend that straight away because this publication has good vocabulary that will increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The writer giving his/her effort to place every word into satisfaction arrangement in writing *Modern Cable Television Technology: Video, Voice, and Data Communications* (The Morgan Kaufmann Series in Networking) although doesn't forget the main place, giving the reader the hottest and based confirm resource information that maybe you can be considered one of it. This great information can draw you into brand new stage of crucial pondering.

Elsie Hawkins:

This *Modern Cable Television Technology: Video, Voice, and Data Communications* (The Morgan Kaufmann Series in Networking) is great e-book for you because the content which is full of information for you who all always deal with world and also have to make decision every minute. This kind of book reveal it info accurately using great plan word or we can say no rambling sentences within it. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only gives you straight forward sentences but

difficult core information with beautiful delivering sentences. Having Modern Cable Television Technology: Video, Voice, and Data Communications (The Morgan Kaufmann Series in Networking) in your hand like having the world in your arm, info in it is not ridiculous a single. We can say that no reserve that offer you world within ten or fifteen minute right but this publication already do that. So , this is certainly good reading book. Hey Mr. and Mrs. busy do you still doubt this?
