Augustine's Laws By Norman R. Augustine

This text is a collection of 52 laws that cover every area of business. Each law formulates a home truth about business life, such as, "One-tenth of the participants produce over one-third of the output. Increasing the number of participants merely reduces the average output". Another example of one of "Augustine's Laws" is Law Number XI, "If the Earth could be made to rotate twice as fast, managers would get twice as much done. If the Earth could be made to rotate 20 times as fast, everyone else would get twice as much done since all the managers would fly off".
