Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications By Daniel Minoli

"If we had computers that knew everything there was to know about things—using data they gathered without any help from us—we would be able to track and count everything, and greatly reduce waste, loss, and cost. We would know when things needed replacing, repairing or recalling, and whether they were fresh or past their best. The Internet of Things has the potential to change the world, just as the Internet did. Maybe even more so."

—Kevin Ashton, originator of the term, Internet of Things

An examination of the concept and unimagined potential unleashed by the Internet of Things (IoT) with IPv6 and MIPv6

What is the Internet of Things? How can it help my organization? What is the cost of deploying such a system? What are the security implications? *Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications* answers these questions and many more.

This essential book explains the concept and potential that the IoT presents, from mobile applications that allow home appliances to be programmed remotely, to solutions in manufacturing and energy conservation. It features a tutorial for implementing the IoT using IPv6 and Mobile IPv6 and offers complete chapter coverage that explains:

- What is the Internet of Things?
- Internet of Things definitions and frameworks
- Internet of Things application examples
- Fundamental IoT mechanisms and key technologies
- Evolving IoT standards
- Layer 1/2 connectivity: wireless technologies for the IoT
- Layer 3 connectivity: IPv6 technologies for the IoT
- IPv6 over low power WPAN (6lowpan)

Easily accessible, applicable, and not overly technical, *Building the Internet of*

Things with IPv6 and MIPv6 is an important resource for Internet and ISP providers, telecommunications companies, wireless providers, logistics professionals, and engineers in equipment development, as well as graduate students in computer science and computer engineering courses.

Editorial Review

About the Author

DANIEL MINOLI has worked extensively in Internet and IP engineering, design, and implementations at organizations including Telcordia (Bellcore), Prudential Securities, AT&T, Capital One Financial, and Gartner/DataPro. A former lecturer at Stevens Institute of Technology, NYU's Information Technology Institute, and Rutgers University, Mr. Minoli has written columns for *Computerworld*, *Network World*, and *Network Computing* magazines and is the author of more than ten Wiley publications.

Users Review

From reader reviews:

Juan Palmer:

The book Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications make one feel enjoy for your spare time. You can utilize to make your capable much more increase. Book can for being your best friend when you getting anxiety or having big problem using your subject. If you can make looking at a book Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications to get your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about several or all subjects. You can know everything if you like available and read a publication Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications. Kinds of book are a lot of. It means that, science book or encyclopedia or other people. So , how do you think about this guide?

Brandon Harmon:

Spent a free time for you to be fun activity to try and do! A lot of people spent their spare time with their family, or their friends. Usually they accomplishing activity like watching television, gonna beach, or picnic from the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your free time/ holiday? Can be reading a book may be option to fill your free time/ holiday. The first thing that you'll ask may be what kinds of e-book that you should read. If you want to try look for book, may be the book untitled Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications can be very good book to read. May be it can be best activity to you.

Albert Christensen:

This Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications is great e-book for you because the content that is certainly full of information for you who else always deal with world and still have to make decision every minute. This book reveal it information accurately using great manage word or we can state no rambling sentences inside it. So if you are read the idea hurriedly you

can have whole info in it. Doesn't mean it only will give you straight forward sentences but tough core information with beautiful delivering sentences. Having Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications in your hand like obtaining the world in your arm, info in it is not ridiculous one. We can say that no guide that offer you world in ten or fifteen minute right but this e-book already do that. So , this is certainly good reading book. Hello Mr. and Mrs. hectic do you still doubt in which?

Brandy Godwin:

In this period globalization it is important to someone to get information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. Often the book that recommended for you is Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications this reserve consist a lot of the information with the condition of this world now. This particular book was represented so why is the world has grown up. The dialect styles that writer value to explain it is easy to understand. Typically the writer made some investigation when he makes this book. This is why this book appropriate all of you.
